Speak Better

The AI-coached speaking course where people **practise**, not just watch.

Raising \$100,000

speakbetter.app

THE PROBLEM

Speaking is learned by doing. Most courses only let you watch.

The fear is real

Speaking in front of people is one of the most common fears there is – and it holds back careers, businesses and voices. [Add a sourced statistic – figure and source]

Playback isn't practice

Most speaking courses are videos to watch. Nobody records, nobody gets feedback on their own delivery, so nothing changes on camera or on stage.

Coaching doesn't scale

Real improvement needs someone watching every take. A coach's hours are expensive and limited, so only a few ever get that.

THE FOUNDER

Tariq EQ Amawi

TEDx speaker · Slam poetry winner · National writing winner ·
Creator of the Mic Drop Method

- His first-ever public speech was a TEDx talk in Bali – it drew more than ten times the views of any other talk at that conference.
- Standing ovations at festivals and institutions in Europe, Asia and Australia.
- Writes speeches for entrepreneurs – one led to a TED talk, another was delivered to 8,000 people in Okinawa.

THE METHOD, PROVEN BY HAND

Before the app, Tariq coached every take himself

1

Students record

In his live Communicate and Captivate cohorts, students uploaded videos of themselves taking speaking challenges.

2

Tariq watches every one

He gave each person feedback from the methodology he had distilled from years on stage.

3

Nervous to confident in weeks

Students went from awkward on day one to confident by week four – starting podcasts, going live and booking talks of their own.

THE SOLUTION

Speak Better: six weeks of practice, coached on every take

83

skill lessons

1-2 minutes each, sorted into eight colours of speaking.

25

filmed challenges

A 3D journey through five stages: S.T.O.R.Y.

Every

takes reviewed

Coach, the AI coach, watches and scores every attempt.

6 wks

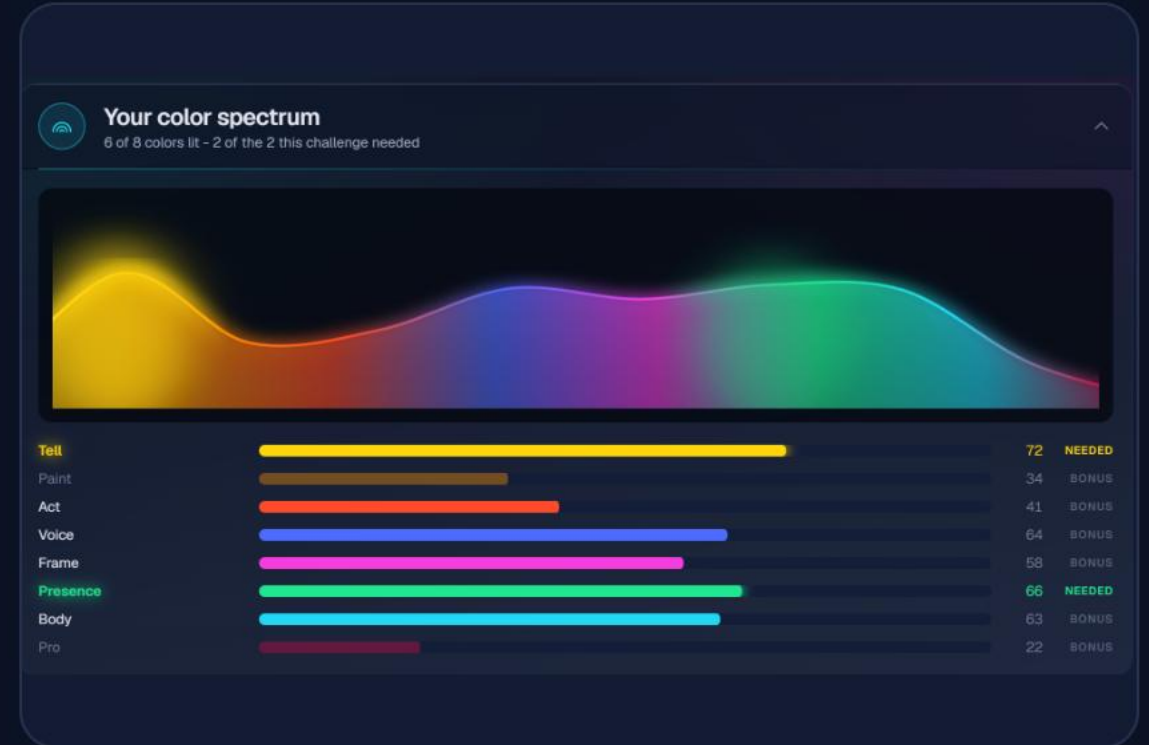

live cohort

Weekly live sessions with Tariq, everyone moving together.

THE AI COACH

Coach watches every take

- Reads gestures, eye contact, voice and the story itself.
- Scores the Speaking Spectrum: eight colours – Tell, Paint, Act, Voice, Frame, Presence, Body and Pro.
- Says what worked and the one thing to try next – written, or spoken aloud with captions.
- Answers questions about how the student is developing, any time.

ONE METHOD, THREE FORMATS

The app, the deck and the book

The app

Lessons, challenges, Coach and the live cohort. Live at speakbetter.app.

The deck

77 cards, one per skill, in the eight colours. Digital in the app; printed with VIP.

The book

The 8 Colors of Fearless, Unforgettable Speaking. In writing – waitlist open.

WHY NOW

AI can now watch every take - for about 11 cents.

Until recently, feedback on a video meant a human watching it. Multimodal AI changes the cost of feedback from dollars to cents, so coaching every take is finally affordable at course prices.

HOW IT'S DIFFERENT

Practice, feedback and a teacher - in one place

Momentum	Self-paced, easy to drift	Dated six-week cohort, game layer, streaks
Progress	Hard to see	Eight-colour spectrum, first take against latest
Privacy	Varies	Recordings stay on the phone; only anonymised text, with consent
